

NMCB ONE Detail Andros

SEABEES ARRIVE ON ANDROS ISLAND

By: LTJG Russell Bates

Embarking to Andros Island is no small task. Seabees from NMCB ONE's DFT Grenada found out the hard way as 18 Seabees recently made the long journey towards the Bahamas Island chain. UTC (SCW) Nasso, Det AOIC, referred to the trip to Andros as "Planes, Trains, and Automobiles" while others in the group were just happy to be free from living in tents and eating MRE's (meals ready to eat) and UGR's (unified ground rations). After three consecutive days of travel, Detail Andros arrived on island to conduct a successful joint turnover with the "Fighting Forty".

During the Andros deployment NMCB ONE personnel will focus their efforts on completing a 9,500 sq ft Barracks, weather tightening, and squaring away the Material

Liaison Office storage building, yard, and inventory control system. With temperatures in the mid 70s, the weather makes for ideal working conditions but, don't forget your sun block! Future planned events for the Detail include softball challenges with the only other military forces on island (Security) and snorkeling trips around the southern end of the island. In First and Finest fashion, NMCB ONE is set to make a positive mark on Andros Island and ensure our relief is set for success.
